Life Skills

Nowadays, some schools are teaching life skills as well as traditional subjects. Some people say this prepares students better for life in the real world, whereas others say it is not necessary.

In my opinion, school should prepare students for adult life. Financial skills such as budget planning and saving money are essential to avoid falling into debt. It would also be a good idea to learn basic cooking, as this is fundamental for survival when you are living on your own.

On the other hand, some people argue that there is no time for extra subjects at school and that life skills should be learnt at home. Personally, I think we already learn many life skills while doing traditional subjects. For example, we learn teamworking by doing group projects, and organising our homework teaches us time management skills.

To sum up, I believe all schools should teach life skills. It would not require too much extra work because there is no need to teach them separately from conventional subjects. This will make sure that students leave school better prepared for university and work.

Problem statement

Create a Bank Account object with the following properties and methods:

- A `name` property is set to "Alex".
- A `balance` property is set to 0.
- A `credit()` method adding the (positive or negative) value passed as an argument to the account balance.
- A `describe()` method returning the account description.

```
1   var account = {
2     name: 'Alex',
3     balance: 0,
4     credit(value){
5       this.balance += value;
6       return t        Cannot edit in read-only editor
7     },
8     describe(){
9       return `Your name is ${this.name} and balance is ${this.balance}`;
10    }
11  };
```
